

How to install Parallels Toolbox for Mac

- Parallels Toolbox
- Parallels Toolbox Business Edition

Information

To install Parallels Toolbox for Mac, follow the steps below:

Note: If you use Parallels Desktop for Mac, follow the installation steps in [KB 123925](#).

1. [Download the .dmg installation file](#). Double-click the file to open it.
2. After accepting the Parallels End-User License Agreement you will see the Parallels Toolbox installation window. Double-click on **Install Parallels Toolbox**.

3. The Parallels Toolbox icon will appear in the menu bar and you can start using the application. See [KB 123904](#) to learn how to use Parallels Toolbox after installation.
