Parallels Toolbox 3.0.0 for Mac (November 6, 2018)

This version of Parallels Toolbox 3.0.0 (2073) for Mac addresses overall stability and performance issues, and includes the following features and new tools:

New tools (available for users who have a subscription either to Parallels Toolbox or Parallels Desktop for Mac)

- “Uninstall Apps” – this tool helps to completely remove applications, i.e. doesn’t leave any leftover files on the Mac’s hard disk. It can be also used to delete leftovers of the previously removed apps.
- “World Time” – with just one click, you can check the local time and time offset information in thousands of locations around the globe.

- “Hidden Files” – shows and conceals files and folders normally hidden in macOS.

New features

- “Download Video” can now download playlists from video hosting websites.
- “Record Audio” can save audio files as MP3.
- “Resize Image” can convert images to and from the .HEIF format.
- When taking a screenshot, the active window remains in focus (i.e. its highlighted elements don’t turn gray).
- Choose where tools save resulting files (screenshots, audio files, videos, etc.) in the tools’ preferences.
- There are many tools in the Parallels Toolbox window - use the Search field to find the tool you need.
- If you don’t want the Parallels Toolbox window to look overcrowded, hide the tools you don’t use in the Parallels Toolbox preferences.

Support for macOS 10.14 Mojave

- New Dark Mode for macOS 10.14 Mojave.
- Annotate screenshots by adding captions, arrows, etc.
- New Safari extension for “Download Video” (compatible with Safari 12).
- Support for macOS 10.14 Mojave security restrictions.

Other improvements

- When taking a screenshot, the active window remains in focus (i.e. its highlighted elements don’t turn gray).
