

Unable to change input source in guest OS using CMD + Space shortcut

- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition
- Parallels Desktop
- Parallels Desktop for Mac Standard Edition

Symptoms

I cannot change keyboard language in guest OS using **CMD + Space** shortcut.

Resolution

Click on **Apple Logo** > open **System Preferences** > **Keyboard** > **Shortcuts** > **Input Sources** > change **Select the previous input source** option shortcut to **CMD+Space**.

NOTE: You should change the shortcut from **Select next source in input source** option to **Select the previous input source** so it would look like this:
