

Uninstalling Parallels Client using cmd

- Parallels Remote Application Server

Procedure

- Run **cmd** with Administrative privileges.

NOTE: Please use the command in the same folder where **RASClient.msi** is located. Or specify the full path to the installer.

- Run the following command for **32 bit** Client:

```
msiexec /uninstall RASClient.msi
```

- Or the following command for **64 bit** Client:

```
msiexec /uninstall RASClient-x64.msi
```

- Use */quiet* option to uninstall the client silently.
- Use */passive* option instead of */quiet* to see a progress bar.

Execution examples:

NOTE: Execute *msiexec /?* command to get information on available options.
