

Download Parallels Tools for legacy operating systems

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Although Parallels Tools are no longer supported for these legacy operating systems (see [KB124223](#)):

- OS/2
- eComStation
- Windows NT 4.0
- Windows 9x
- Solaris

Note: Parallels Desktop 20 and newer versions no longer support Solaris as a guest operating system.

you may, at your own risk, try installing them to potentially get some integration features enabled.

Instructions

To download the drivers please [click here](#).

Mount the image to virtual machine's CD/DVD drive to install drivers: click on **Parallels** menu > **Devices** > **CD/DVD** > **Connect image...**

NOTE. Every driver applies to a different set of operating systems:

Video driver

- Windows NT 4.0
- Windows 9x

Network driver

This is Realtek 8029 driver. See the list of supported OSes in the driver directory.

Sound driver

- OS/2

Mouse driver

- OS/2
- eComStation

Clipboard synchronization

- OS/2

To install the driver, follow installation instructions for your type of operating system available on the Internet.
