

How to collect Client Saved Job in Linux

- Parallels Remote Application Server

Client Saved Job files in Linux are located in `/var/spool/cups` folder.

To reach them one should do the following:

1. Open the Terminal and copy `/var/spool/cups` to any place where the current user has access (e.g., Desktop of the current user):

```
sudo cp -r /var/spool/cups/ ~/Desktop
```

2. Set '777' permissions to the copied 'cups' folder:

```
sudo chmod -R 777 ~/Desktop/cups
```

3. Open the copied folder and verify that there are some files named like "d00006-001" in it:

4. Rename them adding .pdf extension:

5. Open them using installed PDF viewer application or copy somewhere for further investigations.
