

How to enforce "Check for updates on startup" feature on clients

- Parallels Remote Application Server

Information

This article describes, how to enable the "**Check for updates on startup**" feature at Parallels Client via RAS Policies.

Instruction

1. Make sure that you have enabled the "**Check for updates on startup**" feature in **RAS Console > Policies > Policy > Options > General**:
2. Select a user *or* users group in your Active Directory for whom this **Policy** will be applied.
3. Press **OK** button and close **Policy Properties** window.
4. **Policy** will be applied on the next user's login and Parallels Client will check updates availability upon the next launch. Should you need to force this, close Parallels Client via **File > Exit** and restart it.
