

Unable to import Boot Camp to Parallels Desktop virtual machine

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

Symptoms

I have got a new Mac and would like to transfer my existing Boot Camp partition from my old Mac to the new one.

Every time I try to import Boot Camp I get **Failed to import the virtual machine. An error occurred while trying to import the virtual machine.** error message.

Cause

Disk issues with Boot Camp partition.

Resolution

Check Windows hard disk for errors by following step-by-step instructions below:

1. Boot into Boot Camp natively.
2. Run Windows built-in utility to check the disk as described in KB 115549.
3. Restart Windows to apply changes in the system.
4. Go back to macOS and import Boot Camp again.
