

Runtime Error: Server Error '/' Application.

- Parallels Device Management

Introduction

In order to troubleshoot some issues with images downloading, it's possible to download netboot or system images from a NetBoot server manually. By default all images are stored in C:\pmmimages.

NOTE: This setting can be changed in the **NetBoot Server Configuration Utility**.

When the NetBoot server is configured properly you can download any image by using the link <http://netbootserverIP/pmmimages>

Server Error '/' Application.

But occasionally you can see the following error in your web browser instead of the list with images:

Cause and Resolution

This error message appears when the **Web.Config** file is missed in C:\pmmimages folder. To restore the **Web.Config** file you need to run the **NetBoot Server Configuration Utility** and reconfigure it again.
