Creating a sublicense for Parallels Remote Application Server

- Parallels Remote Application Server

Creating sublicense

Login into Parallels My Account

NOTE: *This should be an account which already has valid license key registered with it.*

On **Dashboard** click at **Active subscriptions and permanent licenses**:

Choose the subscription which is going to be used for a sublicense creation:

Click **Create License Key**:

Assign the amount of licenses for a new License Key:

After pressing **Save** it will take a moment to load new information and the following message will pop-up at the top:

Now your newly created license key will be available:

Removing sublicense

If you decide to remove sublicense at some point, click on the "gear" button next to a sublicense:

And then click **Delete Key** to remove it permanently:

When deletion was successful the following message will appear:

As a result, Primary Key will get licenses back and sublicense will disappear:
