Failed to execute Join Domain step

- Parallels Device Management

Symptoms

'**Join Domain**' step fails during Task Sequence.
In the case of OSD Task Sequence pmm_launchd_helper.log has this error:

```
join_domain: Binding to domain DOMAIN_NAME...MSG:Binding...
dsconfigad: Computer name must be less than 15 characters
```

In the case of non-OSD Task Sequence pma_agent.log has these records:

```
12-09 09:57:16.917 D /PrlCommonUtils:1471:307/ Process
'/Library/Parallels/pma_agent.app/Contents/Resources/../Resources/scripts/join_domai
finished with (0:65)

12-09 09:57:16.918 D /TsMgmtAgent:1471:307/ Task Sequence
P0120491-P0100739-6F6BCC28 failed: Script join_domain.sh failed (exit code:
65, status: 0)
```

Cause

Mac's name has 15 characters or more.

Resolution

Set **Computer name** less than 15 characters.
