How to install Parallels Client on Chrome OS from Web Store

- Parallels Remote Application Server

Information

Please pay attention that Parallels Client **can't be installed from Google Play Store** on Chrome OS, you should use **Web Store** for it:

1. Click on the Launcher icon in the left bottom corner:

2. Find the **Web Store** icon and click on it:

3. Type **Parallels Client** in the search field on the left and press **Enter**:

4. Switch to **Applications** in the search results:

5. Find Parallels Client and click **Install**:

6. Click **Add app** in the pop-up menu:

7. Done! Parallels Client can be found in the Launcher menu:
