

CMAAppUtil: Bad CPU type in executable

- Parallels Device Management

Symptoms

When you try to create an app for SCCM using **CMAAppUtil** on macOS 10.15, you get error **CMAAppUtil: Bad CPU type in executable**.

Cause

You are running x86 version of **CMAAppUtil** that is not supported by macOS 10.15 or newer.

Resolution

Please use x64 version of **CMAAppUtil** that was released by Microsoft in **SCCM 1910**.

It can be downloaded here: <https://www.microsoft.com/en-us/download/details.aspx?id=100850>
