

Error: License key is used by another farm

- Parallels Remote Application Server

Symptoms

You get an error **Error: License key is used by another farm** when trying to activate the farm:

Cause

The subscription license key can be used for licensing only one farm at any one time.

Resolution

Please deactivate the old farm prior to activating the new as suggested [Here](#)

If you would like to keep several farms activated with your license, you can issue a [sub license key](#) and use it for this purpose
