

How to decommission RD Session Hosts from RAS Farm

• Parallels Remote Application Server

Information
To decommission RD Session Hosts from an existing RAS Farm please do the following:
 Go to RAS Console Farm RD Session Hosts; Select the servers that should be decommissioned, right-click on them and click Delete:
3. If you receive error message like Cannot delete 'SERVERNAME' because it is in use by: Published item: #ID.NAME, please delete the mentioned published items or change their properties to use some other RDS Hosts:
To do do, please proceed to RAS Console Publishing Published Resources and edit the affected published items:
