

## How to grant admin with permissions to view and manage user sessions only?

- Parallels Remote Application Server

### Information

How to grant admin with permissions to view and manage user sessions only?

### Resolution

1. Launch **RAS Console** and proceed to **Administration** **Accounts**;
2. Click **Tasks** **Add...**:

3. Click the "... " button and select the domain account that will be used to manage sessions, set the permissions to **Custom administration**, click **OK** and **Apply**:

4. Open the properties of the newly created account and click **Change Permissions...**:

5. Select the proper site on the left pane and click **Change permissions...**:

6. Go to **Themes** and enable option **Manage sessions** in **Global permissions** or for each theme individually and click **OK, OK, OK** and **Apply**:

Now when the new admin logs in RAS Console he'll be able to manage sessions only:
