

CMappUtil fails to create detection rules for application automatically and brackets aren't allowed in detection rule

• Parallels Remote Application Server

Symptoms

CMappUtil fails to create detection rules for application automatically and you can't follow <u>this KB article</u> as SCCM doesn't accept brackets in the **Value** field:

Resolution

Update **CMappUtil** to the most recent version and use it to create the .cmmac file.

If it fails, too, please consider changing the **Setting Type** from **Application Bundle** to **Package ID**, it doesn't contain brackets:
