

Configuring RemoteFX USB Redirection using RAS Policies

- Parallels Remote Application Server 18.0

With the release of RAS v18, it is now possible to configure RemoteFX USB redirection using RAS policies or via the corresponding setting at Parallels.

RAS Policy:

Parallels Client > **Tools** > **Options** > **Advanced settings** tab:

Once enabled, this setting is changing the following value in registry:

HKLM\SOFTWARE\Policies\Microsoft\Windows NT\Terminal
Services\Client\fb**UsbRedirectionEnableMode** REG_DWORD to value =2

To apply the changes, the client PC requires reboot.
