

BT mouse & trackpad support for iOS

- Parallels Remote Application Server 18.0

iPadOS 13.4 introduces support for mouse and trackpad with iPad for greater precision. Parallels Client 18 for iOS supports the new capabilities of using third party Bluetooth mouse and trackpad, promoting end user productivity and flexibility.

Prerequisites

- Bluetooth mouse and trackpad
- Parallels Client 18 for iOS (iPadOS)
- iPadOS only supports Bluetooth mouse and trackpad.
