

# How to publish mmc with a specific snap-in

• Parallels Remote Application Server

### Information

When publishing an application with a parameter, it's necessary to use quotes when the parameter string contains a path with spaces or system variables.

### **Procedure**

Navigate to Parallels Remote Application Server Console > Publishing, and click Add:

Most of the fields will be filled automatically:
Rename application and specify the parameter in quotes if system variable is used and click <b>Finish</b> :

Parameter syntax: "%windir%\System32\dsa.msc" Alternatively, use the actual path without variable and click **Finish**:

As a result, when launched from Parallels Client, the application will look the same way as it would be launched with parameter specified in Windows CLI, Powershell or a shortcut to mmc.exe:

## **Common Windows snap-ins**

#### .MSC file Console snap-in

azman.msc Authorization Manager certlm.msc Certificates Local Computer

certmgr.msc Certificates

comexp.msc Component Services compmgmt.msc Computer Management

devmgmt.msc Device Manager devmoderunasuserconfig.msc User Manager diskmgmt.msc Disk Management eventvwr.msc **Event Viewer Shared Folders** fsmgmt.msc **Group Policy Editor** gpedit.msc Local Users and Groups lusrmgr.msc perfmon.msc Performance Monitor printmanagement.msc Print Management rsop.msc Resultant Set of Policies secpol.msc **Local Security Policy** services.msc Services Manager taskschd.msc Task Scheduler

tpm.msc Trusted Platform Module Management

wf.msc Windows Firewall wmimgmt.msc WMI Management

### Windows Server snap-ins

.MSC file Console Snap-in

adfs.msc Active Directory Federation Services

adsiedit.msc ADSI Edit

certim.msc Local Computer Certificates
certsrv.msc Certification Authority
certtmpl.msc Certification Templates
ciadv.msc Indexing Service

cluadmin.msc Failover Cluster Manager

da6to4.msc Network Interfaces Performance Monitor daihttps.msc HTTPS Traffic Performance Monitor

daipsecdos.msc IPSec Performance Monitor daisatapmsc ISATAP Performance Monitor

dfsmgmt.msc DFS Management DHCP Management DNS Manager

domain.msc Active Directory Domains and Trust dsa.msc Active Directory Users and Computers. Active Directory Sites and Services dssite.msc File Server Resource Manager fsrm.msc Microsoft Fax Service Manager fxsadmin.msc Group Policy Management gpmc.msc **Group Policy Mangement Editor** gpme.msc gptedit.msc Group Policy Starter GPO Editor hcscfg.msc Health Registration Authority

idmumgmt.msc Microsoft Identity Management for Unix iis.msc Internet Information Services Manager iis6.msc Internet Information Services Manager 6.0
