

Images are pretty small on the print preview page while using Parallels Client for Mac

- Parallels Remote Application Server

Symptoms

- Some proprietary application in use. While generating a document (invoice, check, etc) the images are much smaller than they should.
- This issue is occurring while working in Parallels Client for Mac only.

Cause

Misconfiguration. An app cannot handle Mac Hi-DPI resolution properly.

Resolution

At **Parallels Client > Preferences > Advanced > uncheck DPI Aware**
