

Some installed applications aren't displayed in the publishing wizard

• Parallels Remote Application Server

Symptoms

Some installed applications aren't displayed in the publishing wizard:

Cause

Only applications having shortcuts placed in the common Start menu (typically **%ProgramData%\Microsoft\Windows\Start Menu**) are displayed in the dialog.

Resolution

Please check the properties of the missing shortcut on the RD session host and make sure that it is located in the common Start menu (%ProgramData%\Microsoft\Windows\Start Menu\), not in the user profile (%AppData%\Microsoft\Windows\Start Menu\Programs)
