

Setting up printing from Windows with Parallels Desktop for Chrome OS Enterprise and Education Edition

- Parallels Desktop for Chrome OS Enterprise and Education Edition

To print from Windows applications, allow Windows to access the printers connected to your Chromebook.

Do the following:

1. Click the **Printer** icon in the top right corner of the virtual machine window.
2. Enable permissions for **Printers**. Your Chromebook printers will become available for printing in Windows apps.

3. To print from a Windows app, you usually need to click **File > Print**.
