HALB update

- Parallels Remote Application Server

Information

HALB appliances do not support up in-place upgrade unlike other Parallels RAS components.

You need to replace the old appliance with a new one preserving its network settings.

Please follow the steps below to perform the upgrade:

1. Take a note of the current HALB configuration - IP address, subnet mask, Default Gateway, DNS servers and so on:

2. Go to the Parallels RAS download link and download the HALB appliance in the appropriate format;

3. Import it to your hypervisor and assign it to the same network as the old appliance;

4. Go to **RAS Console** **Farm** **HALB** **Devices** and remove the old appliance:

5. Shutdown the old appliance;

6. Configure the new appliance using the settings from step 1;

7. Add the new appliance to RAS Console and click Apply;

8. Remove the old appliance from the hypervisor.
