|| Parallels[®]

The Certificates is not yet valid

• Parallels Remote Application Server

Symptoms

After renewing SSL certificate in RAS or installing a brand new one users get a warning **The Certificates is not** yet valid <11>

Cause

The certificate validity date is stored in UTC timezone.

For users in some time zones, this date may be taken as the future.

Resolution

The issue will resolve itself in less than 24 hours.

You can suppress the warning message using the same approach as in this KB article.
