

NLA credentials validation fails

- Parallels Remote Application Server

Symptoms

Windows security events of Login Failure type are generated for NLAUser account on Active Directory Server when AD credentials validation is performed from:

RAS Console > Farm Enrollment Servers > AD Integration > Validate AD Integration Settings

The following warning from RAS Console is observed:

Cause

Deny log on though Remote Desktop Services is applied not only to RD Session Hosts but to Active Directory server itself.

Resolution

Reconfigure policies as described in the following [article](#)
