

## **Could not display Active directory object browser. Please check domain settings**

- Parallels Remote Application Server

### **Symptoms**

Error **Could not display Active directory object browser. Please check domain settings** is thrown when you try to browse for **Target OU** in Template properties:

### **Cause**

Wrong domain name is specified or the administrator's account has option **User must changed password at next logon** enabled:

## Resolution

Please make sure that you have specified the correct domain name and uncheck that option.

**Administrator password:** Local Admin password for the template VM.

**Password:** Domain Admin password.
