

How to remove Apple updates from WSUS

- Parallels Device Management

Information

If you need to remove already published Apple updates from WSUS please follow the steps below:

1. On the WSUS server open CMD console as Administrator.
2. Navigate to **C:\Program Files (x86)\Parallels\Parallels Device Management for Configuration Manager**
3. run the following command:
wsus-publisher.exe delete

If you need to republish Apple updates, restart system service **pmm_sup_service**
