

How to redirect a folder on Android 10 and above

- Parallels Remote Application Server 19.0

On Parallels Client for Android:

1. Go to **Edit connections** (long tap on RAS connection> Gear icon).
2. Advanced>Local resources> enable **Share folder**. Accept the permission to get access to file system.
3. Once you configure it, a **Shared folder** icon will appear.
4. Choose which file should be shared with remote desktop/application.
5. Use RAS connection to launch a published item.
6. Redirected folder could be observed.
7. Files are matching in local folder and redirected drive.
