

Accessing IBM AS/400 in

<https://support.parallels.com//Parallels/Pages/Support/Tabs/KCS/Tab>

- Parallels Secure Workspace

Resolution

1. On a Microsoft Windows RD session host: Install an application that is able to access the AS/400.
Optionally: publish this application as a RemoteApp.
 2. In Parallels Secure Workspace:
 1. Add this RD session host as a server (**System Settings > Manage > Application Servers**).
 2. Under **System Settings > Manage > Applications**: publish a Desktop Application or Remote Application (based on your preference).
