

Manually close a user's application or user session

- Parallels Secure Workspace

Resolution

Using the **Dashboard** application as an administrator, navigate to **Activity**.

This will list all **user sessions** and when expanding the user session, their open **application sessions** will be listed as well.

To close an application session: use the "**Terminate**" button located at the right of the application session.

To close a user session: use the "**Sign out**" button located at the right of the user's session.
