

How to use search feature in RAS Policy.

- Parallels Remote Application Server 19.0

The search feature in RAS Policy is available in RAS v19

1. Go to **Policy tab** > **Tasks** and click on **Add**.
2. In the **Find** field, type any specific Policy Property you want to configure.

For example **Display**

3. The **Display** policies should be highlighted in the tree.

Note: We should type the first 2 letters of any word in the policy.

4. You can click the **next** and **previous** buttons to move to the next or previous matching words.
 5. Once you find the desired setting, you can configure the respective policy and click **OK**.
