

Retrieving direct link (URL) to application, file or folder

- Parallels Secure Workspace

Resolution

1. In the Workspace, first **select** the item (application, file or folder) for which you want to create a shortcut. When the item has been selected, a tick (✓) will be visible.
 2. Click the **info button (i)** at the top right in the toolbar. A pane will appear, at the right which will show some details, including the link.
 3. In this navigation pane, there is a **direct link** which you can copy-paste.
