

Making an application entirely accessible when it's larger than the device's screen

- Parallels Secure Workspace

Resolution

As an administrator:

1. Navigate to **System Settings > Manage > Applications** and select the affected application.
2. Specify at least a **minimum size** and define a proper height and width.

If the end users rely on a touch screen, they should be able to pan when using 3 fingers as specified in the [User Manual](#) .
