

Change scaling in Red Hat Linux Enterprise (RHEL) virtual machine in Parallels Desktop on M Series Mac computers

- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac App Store Edition
- Parallels Desktop for Mac Pro Edition

This article will help you to solve the issue when changing scaling in Red Hat Enterprise Linux (RHEL) Arm virtual machine (VM) to 200% doesn't have any effect.

Resolution

To make 200% scaling persistent across VM window size, perform the steps below:

1. Start your RHEL virtual machine.
2. Open the Terminal within the virtual machine.
3. Execute the following command:

```
gsettings set org.gnome.desktop.interface scaling-factor 2
```
