Error: The Client Execute request could not be satisfied because the requested application was blocked by policy from being launched on the server.

- Parallels Secure Workspace

Symptoms

When starting an application, the end user sees this error in a notification in the Workspace:

Error: The Client Execute request could not be satisfied because the requested application was blocked by policy from being launched on the server.

Cause

Incorrect configuration of a group policy on the RD Session Host.

Resolution

See Required group policies for Remote Desktop Server hosts .
