

How to adjust audio quality

• Parallels Remote Application Server

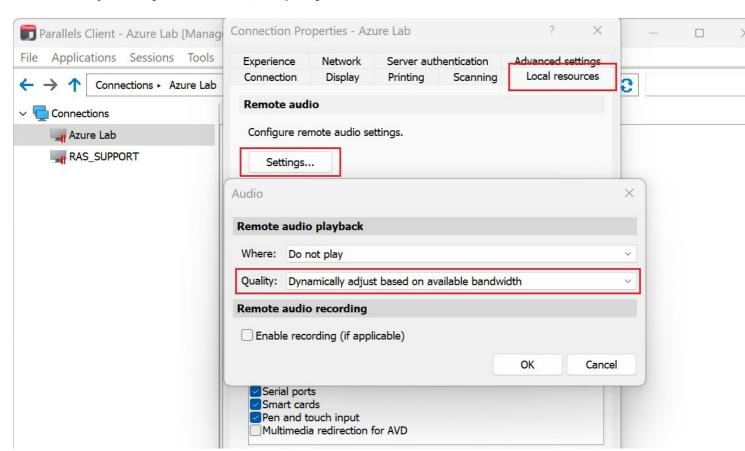

Symptoms

How to adjust audio quality

Resolution

You can adjust the Audio Quality in Parallels Client.

- 1. Launch Parallels Client.
- 2. Right Click on the connection -> Connection Properties.
- 3. Go to Local Resources -> Remote Audio -> Click on settings.
- 4. You can Adjust the option under the **Quality** dropdown.

5. You can adjust this setting using RAS Policies to apply for multiple users.
