

How to fix the issue with a lack of network traffic into a virtual machine via VLAN

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac App Store Edition

Following the upgrade to macOS Big Sur or newer macOS versions, tagged interfaces might no longer function properly inside virtual machines in Parallels Desktop.

Solution

Apple has fixed this issue in the latest macOS 13.3 Ventura update.

Therefore, to resolve this issue, update your macOS to the latest macOS Ventura build by following the steps below:

1. Click on **Apple** logo > **System Settings**:

2. Find **General** option > **Software Update** (You can also see that there is **Software Update available**. You can follow this button.):

3. Press **Update Now** > **Agree** to install macOS Ventura updates:

4. Enter your user password to proceed.

5. Downloading process will start:
