

## **RAS Console is launched together by launching any app published on Azure**

- Parallels Remote Application Server 19.2

### **Symptom**

Launching any published app on Azure, RAS Console is launched together on a client.

### **Cause**

RAS "all-in-one" template on Azure Marketplace configures a logon script which launches RAS Console for all users.

### **Solution**

Remove the logon script by the following steps:

1. Open Local Group Policy Editor (gpedit.msc)
2. Navigate to User Configuration > Windows Settings > Script (Logon/Logoff)
3. Double-click Logon to open the properties
4. In Logon Properties, remove 2 registered scripts
  
5. Click OK
