Parallels DaaS Known Issues:

Build number	Affected component	Description	Resolution/Workaround
20240417 /		Initialization of Parallels DaaS fails when "standard B1ms" instance type is not available in your Azure subscription.	Workaround: Use another Microsoft Azure subscription or region (preferably not a free or sponsored/partner one) wherein the Standard B1ms virtual machine type is available. Resolution: Engineering is currently working on a solution for this issue, which is expected to be resolved in the upcoming updates.
