

Addressing Autodesk Desktop Connector Limitations on Windows ARM Virtual Machines

- Parallels Desktop for Mac Business Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac App Store Edition
- Parallels Desktop for Mac Enterprise Edition
- Parallels Desktop for Mac Standard Edition

We have received feedback from users about being unable to use Autodesk Desktop Connector on Windows virtual machines on Apple Silicon Macs due to architectural incompatibility. These virtual machines use the ARM architecture that is not currently supported by Autodesk Desktop Connector, which is designed for x86-based systems.

Information

At this time, Autodesk has not released a Desktop Connector version compatible with ARM-based Windows systems. However, Autodesk is aware of the demand for ARM-native support.

If you are impacted by this issue or would like to support the request for Autodesk Desktop Connector compatibility with Windows on ARM, we invite you to contribute towards the prioritization of this feature on the Autodesk forum using the link below:
