

Send a technical report to Parallels

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac App Store Edition
- Parallels Desktop for Mac Business Edition

What is a technical report?

Technical data report consists of computer configuration information, log files, and Parallels account & license information. Parallels Engineering and Support teams use this information to diagnose and troubleshoot reported issues. The technical report does not include any sensitive information apart from the displayed screenshot but you can also detach it from the report. For more information about technical data report details, please refer to [KB 114025](#).

Note: Sending a technical data report to Parallels is not considered a request to Parallels Support and does not create a ticket for a Parallels Support team automatically. If you need to open a support request, please visit [this page](#).

How to submit a report?

To send a technical data report to Parallels please follow the steps below:

1. Reproduce the issue you are having with Parallels Desktop.

Note: It is very important to generate a report as soon as the issue appears. Please keep the virtual machine window open and in front when submitting the report.

2. On macOS menu bar click on **Help** tab > **Send Technical Data...**

In Window or Full Screen View modes

In Coherence View mode

If you are using **Coherence** mode, click on the Parallels icon on macOS menu bar, and select **Help** menu > **Send Technical Data...**

3. Wait for the technical data report to be generated.

4. In the form of the appeared window provide a short problem description (scenario) and enter your contact information (name and email address) - then click **Send Report**.

Parallels Desktop

Technical Data Report

Important: This is not a support request. To request support, click [here](#).

If possible, please describe what you were doing when the problem occurred.

☒ Attach screenshots and other files

Before sending this technical report, make sure you're acquainted with our [Privacy Policy](#).
To learn what data we collect, why, how we store and protect it, please [see here](#).

 [See Details...](#) [Send Report](#)

5. Once the report is received by Parallels reports servers, you will get a unique ID number assigned to your report:

Technical report 418506309 has been sent to Parallels.
This is not a support request. To get help, please visit our Support Center.

[Copy Report ID](#) [Support Center...](#) [Close](#)

Note: Save the 9-digit report ID and provide it to the Support Team when submitting a ticket or replying to an existing one. Once the Support Team has your report ID they will be able to identify your report among others in the database. Without the report number, your report can't be processed.

Sending report with detailed logging

In some situations, Support Team may ask you to send a report with detailed (debug) logging enabled. To enable detailed log messages please follow these steps:

1. Click on **Parallels icon** on macOS menu bar > **Preferences...**

2. Navigate to the **Advanced** tab > enable the **Use detailed log messages** feature and close the window.

3. Generate a technical report as usual, using the instructions above.

Sending report from Terminal

You can also send a report using the Terminal.app:

1. Go to **Finder > Applications > Utilities > Terminal**.
2. Run the command:

```
prlsrvctl problem-report --send
```

3. Wait for the technical report to be generated and send. After a successful report submission, you will see

this message in Terminal: *The problem report was successfully sent with id: 123546569*
4. Save the 9-digit **Problem Report ID** and send it to the Support team.
