

Cannot boot Windows 7 after installing Windows updates

- Parallels Desktop
- Parallels Desktop for Mac Standard Edition

Symptoms

Windows 7 cannot start after applying the updates.

You may also see the following error message:

Fatal error 0xc0000034 applying update operation 282 of 120387

Cause

There are system conflicts when Windows 7 Service Pack 1 is installed along with the other Windows updates.

Resolution

Please use the solution from [Microsoft Knowledge Base](#) to get rid of the problem.
