|| Parallels[®]

Parallels Desktop and macOS compatibility

- Parallels Desktop for Mac Standard Edition
- Parallels Desktop for Mac Pro Edition
- Parallels Desktop for Mac Business Edition

The table represents Parallels Desktop and macOS (as the main system) compatibility information. The compatibility table for End-of-Life Parallels Desktop versions <u>is below</u>.

Mac OS version	macOS Sierra	macOS High Sierra	macOS Mojave	macOS Catalina	macO
Parallels Desktop version	10.12 or later	10.13 or later	10.14 or later	10.15 or later	11.0
			?**	?**	?**
Parallels Desktop 19					
Parallels Desktop 18			?	?	?
Parallels Desktop 17		?	?	?	?

* Older Parallels Desktop versions are not fully optimized and compatible with the new macOS release, macOS Sonoma 14. Please check <u>KB 125506</u> for known compatibility and resolved issues prior to upgrading to macOS Sonoma 14. To avoid these issues, <u>upgrade</u> to the latest Parallels Desktop version.

** The marked OS version is not supported by Parallels Desktop 19, and the product installer will set up an earlier product version; support of guest operating systems can be limited. It is recommended to update macOS if possible.

End-of-Life versions of Parallels Desktop
